

Welcome to Year 2024/25 at Wootton School.

Little Gems Class

Miss Klepac & Dr Mirrington Class Teachers

Joe Martin Teaching Assistant

Once upon a star

By James Carter

Here we are

By Oliver Jeffers

Communication & Language

During this term, we will explore the topic 'Space'. We will learn many new words and names of planets with help of songs, rhymes and stories.

Literacy

By this time, some children will move on to Ditty groups where we practice reading and writing words and whole sentences. We will write labels for aliens who might visit our school and look at 'alien words' and 'real words'.

Maths

In Spring Term, the children will explore the composition of numbers 5-10. We will look at equal and unequal sets as well as doubles.

Physical Development

We will continue to use the outdoor equipment to develop our gross motor skills. Fine motor development will be achieved by various cutting, tracing, sorting games in class.

Understanding the world

The focus topic of this term will be space and planets. We will explore our solar system, planet Earth and astronauts.

RE

This term is all about Celebrations. We will explore the question how people celebrate New Year festivals around the world.

Expressive Arts and Design

Playing instruments and singing space related songs is our musical focus for this term. The children have access to a variety of materials and tools, in order to make topic related creations. We will be making a mobile and a calendar together.

Personal, Social and Emotional Development

This term is all about keeping safe. The children will learn what's safe to go onto their body and how to keep themselves safe. We will talk about being safe indoors, outdoors and online. We will then look at people who keep us safe and who can help us.
